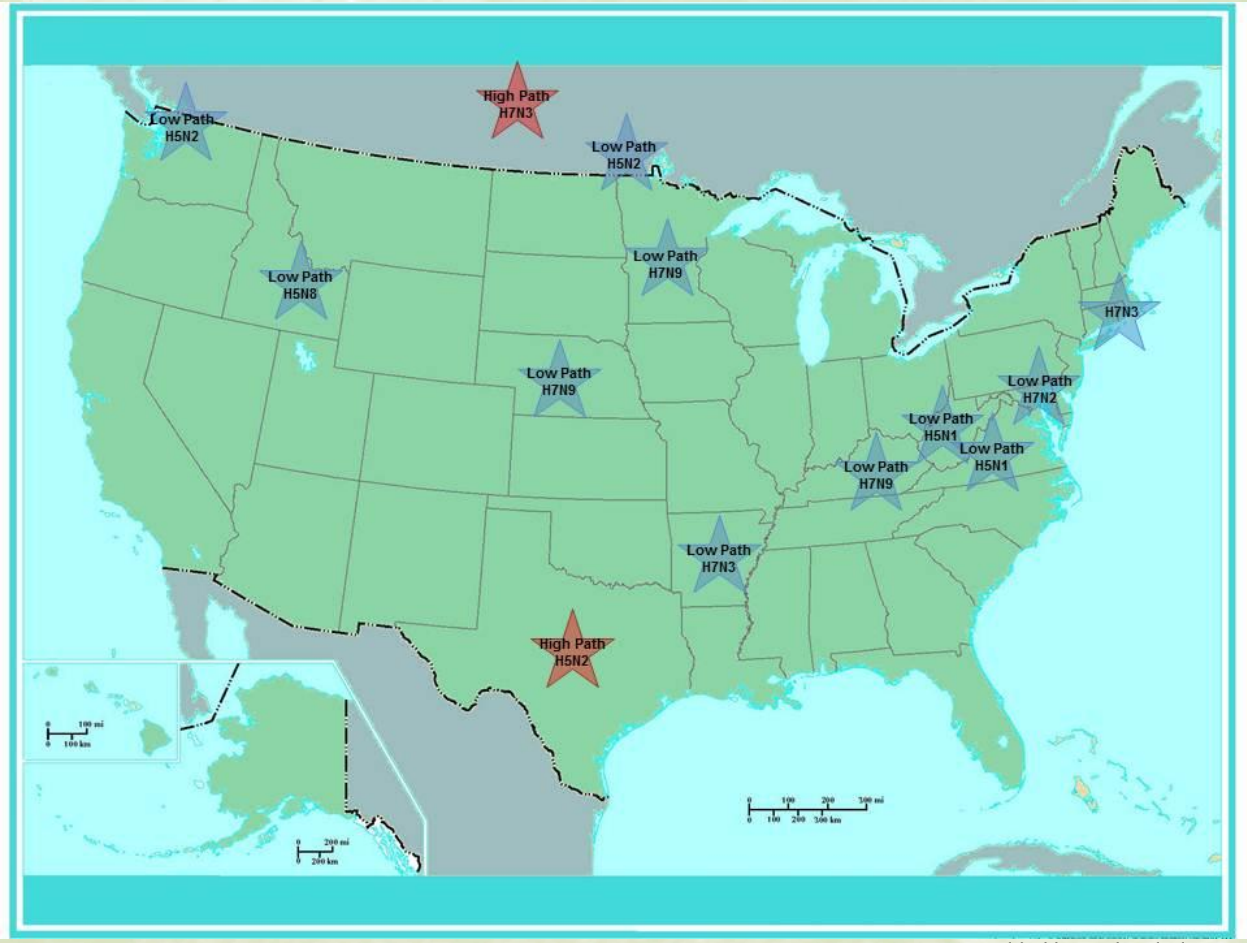
Avian Influenza Cases In North America

This map illustrates avian influenza cases reported by the World Organization for Animal Health (OIE) and Centers for Disease Control and Prevention (CDC).

The star icon illustrates areas with a reported case, while the color indicates if the virus was low pathogenicity (blue) or high pathogenicity (red).

While this map does not illustrate all outbreaks of Avian Influenza in North America, it gives an idea of what viruses and strains are known to have been present in recent years.



Base map provided by NationalAtlas.gov

The following organizations provide up-to-date information on influenza outbreaks via their websites. Please visit these sites for more information on influenza strains in the United States and around the world.

- **OIE** (OIE.int)
- **CDC** (CDC.gov)
- **ProMed** (http://promedmail.org)
