COVID-19 News & Updates

Check Out Updates to Considerations for the Management of Non-Domestic Species During COVID-19

Now is a great time to brush up on the latest news on COVID-19 in the zoological community and to **check out new information that has been posted on this page**, including:

- An up-to-date list of all exotic species in which SARS-CoV-2 infection has been confirmed
- Information about the new Zoetis SARS-CoV-2 vaccine, now available for experimental use with zoological species
- Updated PPE Guidelines
- Updated guidance on working with non-domestic felids

Updated Guidance for Working Around Non-Domestic Felid Species During the COVID-19 Pandemic

The AZA Felid Taxon Advisory Group (TAG) and the Snow Leopard Veterinary Advisory Group have released updated guidance for working with felids in light of recent events.

Read updated guidance documents [here](#).

Confirmation of COVID-19 in Hyenas at a Colorado Zoo

On November 5, 2021, the USDA announced confirmation of SARS-CoV-2 in two spotted hyenas at a zoo in Colorado. These are the first hyenas confirmed with the SARS-CoV-2 virus worldwide. **Read more [here](#).**
